

Lecture 2

ASTR 288P

Sean Griffin

2017/09/08

UMCP / NASA GSFC

What did we cover today?

UNIX:

- Shells (bash, tcsh)
- Basic linux commands (ls, mkdir, cd, cat)
- Navigating the file system (\$HOME, /, mount points)
- Introduction to git (pull, commit, push)
- Editors
- Shortcuts, variables

Remote UNIX:

- ssh; session management using 'screen'
- We did not cover GUI remote sessions (VNC); will get to this later.
